

Knowledge and courtesy land award for Propulsion's LMCA team *Reported by Propulsion directorate*

EDWARDS AFB, CALIF. — PR-West's Logistics Material Control Activity team, or LMCA, at the Propulsion directorate was recently recognized for its outstanding work. The team was presented with the Richard L. Hennes Outstanding LMCA Award given annually to the top LMCA unit in Air Force Materiel Command.

The award-winning team consisted of government employees and new contractor, Armstrong Data Services, or ADS. The function of the LMCA unit is to provide acquisition support to the directorate's research, development and test functions for non-standard supply items and one-of-a-kind items.

During the evaluation period for the award, LMCA operation was transitioned from the government to ADS under the guidance of Pam Raneri and Veronica Norman of AFRL. During the period of transition, the LMCA operation maintained an unparalleled level of excellence. Following a recent Inspector General inspection, Norman was recognized as an "Outstanding Performer."

The Inspector General also praised the LMCA team for having the best IMPAC card management program, outstanding property management, and professional, knowledgeable and courteous employees. In addition to the LMCA award, Materiel Command recognized Raneri for "Outstanding Management as the Quality Assurance Evaluator" and recognized Norman for "Outstanding Service." @

WITH A LITTLE HELP FROM MY FRIENDS — The Logistics Material Control Activity team from the Propulsion directorate at Edwards AFB, Calif., was presented the Richard L. Hennes award for their support to research, outstanding management and professional skills.
